About Me

Motivated and dedicated student currently pursuing a degree in B.E(IT) and learning AI/ML at TOPS Technologies. Enthusiastic about front-end development, Excel dashboards, and data analysis, with hands-on experience in building practical projects.

Skills

- Front-End Development
- Excel Dashboards & Reports
- Python programming
- AI & Machine Learning
- Data analysis
- Problem Solving & Logical Thinking

Education

Bachelor of engineering

LDRP University

2023 - 2027

Currently pursuing a degree in IT while actively building practical skills through projects in front-end development, Excel dashboards, data tracking, and cleaning. Recognized as Ideathon winner organized by the college and Inter-College Cricket League champion, demonstrating creativity, technical ability, teamwork, and problem-solving skills.

Data Science and AI/ML

Tops technologies

2026 - 2027

Enthusiastic learner of Data Science and AI/ML, actively building practical Python-based applications and projects. Developing strong analytical, problem-solving, and soft skills to complement technical expertise. Passionate about applying innovative solutions to real-world challenges and continuously enhancing knowledge for a successful career in technology

Experience

Python Developer

Python Application Project

Developed Python applications to solve practical problems and automate tasks. Implemented data processing, logical algorithms, and user interaction features to enhance application functionality.

Data Analyst

Excel Dashboard Project

Created interactive dashboards in Excel to visualize and interpret complex data sets. Used pivot tables, charts, and formulas to track KPIs and support data-driven insights

Data Engineer

Data Cleaning & Tracking

Performed data cleaning, preprocessing, and validation to ensure high-quality datasets. Tracked patterns and trends to assist in analysis and improve project outcomes.

Front-End Developer

Web/App Interface Development

Designed and implemented responsive front-end interfaces for web and app projects. Applied HTML, CSS, and JavaScript to improve usability, aesthetics, and user experience.

Goals

Aspiring AI/ML Engineer

AI & Machine Learning Enthusiast

Committed to mastering Artificial Intelligence and Machine Learning through continuous learning, hands-on projects, and real-world problem solving.

Aiming to design and implement intelligent systems, predictive models, and AI-driven applications that create tangible impact.
